- DevOps Workflows

LANGUAGES

Arabic — Native
English — Fluent
French — Fluent

SOFT SKILLS

- Problem Solving
- Self-Learning
- Attention to Detail
- Curiosity

PROFILE

Web & Mobile Developer who enjoys the full spectrum of software engineering, from crafting pixel-perfect UIs and building RESTful APIs to developing browser extensions and designing robust DevOps and automation workflows. Comfortable working across the stack with modern front-end frameworks and native Android development, and always exploring new technologies to grow as an engineer.

FEATURED PROJECTS

Portfolio Website Personal Portfolio

Next.js 14 · Tailwind CSS · Framer Motion

- Designed and built a personal portfolio showcasing projects and skills with a modern, animated interface.
- Implemented smooth page and component animations using Framer Motion for an engaging user experience.

Instant News Android News Aggregator

Android · Kotlin · Jetpack Compose · Firebase · Retrofit

- Built a high-performance Android news aggregator that fetches real-time global headlines.
- Implemented custom caching logic enabling seamless offline reading.
- Integrated Retrofit for reliable, seamless REST API communication.

DocReader Document Scanning & Reading App

Android · Kotlin · Jetpack Compose

- Developed a native Android application for scanning and reading documents on the go.

Upwork Job Radar Chrome Extension

HTML5 & CSS3 · JavaScript · Manifest V3

- Built a Chrome extension that helps freelancers track new Upwork job postings in real time.
- Delivered instant notifications based on user-defined search criteria to speed up proposal response times.

Automated Service Heartbeat Tracker Uptime Monitoring Automation

Make.com · HTTP APIs ·

Supabase · Webhooks

- Built an automated monitoring system that checks website health every 12 hours.
- Logged downtime events to a cloud database and triggered developer alerts on failure via webhooks.

EDUCATION

[Degree, e.g. B.Sc. in Computer Science]

Ibn Zohr / Faculty Polydisciplinary, Ouarzazate
